Adhoc Report

- [Adhoc Report#119] - PDF export mechanism

DataSets

- [DataSets#27] - Support for elx-userId, elx-username, elx-userRoleNames, elx-userOid in aggregation pipeline substitutions

ETL

- [ETL-CORE#7] - Allow ETL Parameters to be passed as either string or nested object
- [ETL-CORE#8] - Substitute I18N step
- [ETL-CORE#6] - Add ETLJobs indexes for: started, stopped, runId
- [ETL#149] - Automatic decoding {enc in headers
- [Build#66] - Repository tagging steps
- [ETL#147] - Support for larger XLSX files (maximum length for this record type is 100,000,000)
- [ETL#150] - Workflow new steps: Get Current State, Lookup States
- [ETL#151] - ETL Dependency Tree Viewer
- [ETL-CORE#9] - Config Support for JDBC Connection pool
- [Repository#24] - Enhancement to Git Pull and Git Push steps to accept secret
- [ETL-AWS#3] - S3 Generate Signed URL step

- [Report-Portal#14] - New Report Portal Step for migration of report outputs to Report Portal

Scheduler

- [Scheduler#30] - Allow Scheduler Admin User to modify trigger(s) created by other users
- [Scheduler#32] - Scheduler WaitForDatabaseRecovery
- [Scheduler#33] - Enhance filtering timezone drop down

Log Viewers

- [Log Viewer#12] - Add Roles information in Add User action
- [Log Viewer#17] - Audit logging of form attachments
- [Log Viewer#19] - Audit logging for login failures
- [Log Viewer#13] - Audit logging for Frequency and Job properties
- [Log Viewer#18] - Audit logging for adding artifact via Upload

Repository

- [Repository#28] - Migrating customized rml.html pages from Repertoire 8.x to 2024

Report Portal

- [Report-Portal#12] - Renaming Filename in Render Result Panel
- [Report-Portal#15] - Collapsible SideBar in Report Portal
- [Report-Portal#16] - Restrict user's sharing in the Report Portal by Role
- [Report-Portal#17] - Report Portal role views

Queue Monitor

- [Queue-Monitor#14] - Add duration column and Auto Refresh, JobQueue Query ETL Step

User Settings

- [User-Settings#18] - New User Sessions Panel

Recycle Bin

- [Recycle Bin#10] - Added more artefact types in Recycle Bin

Licence Deployer

- [Licence-Deployer#6] - To show warning message before licence expiry

Bug Fixes

General

- [Build#75] - Fix User will be redirected to "403 Forbidden" page when clicking on the rml template under "Recent" tab

Dashboard

- [Dashboard#137] - Parse back number selections from linear table to Control
- [Dashboard#139] - Fix to reset number range in filter

Forms

- [Form#125] - Fix Repeater Issue
- [Form#129] - Fix Button overlapped with form dialog frame

ETL

- [ETL#148] - Fix IMAP reader Base64 Decode
- [ETL-AWS#2] - Fix for AWS converting our metadata key to lower case

User Settings

- [User Settings#17] - Add scroll bar for 2FA tab when page height not enough

Users

- [Users#10] - Fix unfriendly Error message display when access user module

Repository

- [Repository#26] - Fix error importing files with a Question Mark character into the Repository on Windows
- [Repository#27] - Fix download Zip folder containing "?" Character returned Error [500] on Windows

Adhoc Report

- [Adhoc Report#110] - Fix Derivatives - The additional column by derivative is still displayed after user deletes the derivative

- [Adhoc Report#109] - Fix Derivatives - Format and alignment settings from Derivative are not applied to the additional column
- [Adhoc Report#108] - Fix Derivatives - User cannot save changes
- [Adhoc Report#111] - Fix Derivatives - The data in additional derivative column is empty when the field in Expression is not present in 'Groups' / 'Fields'
- [Adhoc Report#112] - Fix Derivatives - The report is empty when user enters invalid expression
- [Adhoc Report#138] - Fix add new Ad Hoc Reports with Current group

Visualisation

- [Viz#98] - Fix Selections remain unchanged after removal
- [Viz#99] - Fix Column/Row adjustments may not always function as expected
- [Viz#81] - Fix Random chart generated
- [Viz#80] - Fix Columns sorting issue

Import-Export

- [Import-Export#51] - Uploading a JSON Array File throws an exception

Upload-Download

- [Upload-Download#28] - Fix Bulk download multiple files returned errors when Mime.Types is included
